EXECUTIVE SUMMARY - Spike Testing

✓ PASS

GG

Status: **PASS**
 Created: 22 Apr 2022 at 21:33
 Started by: ghiathchaal.beg@gmail.com
 VUs: 25 VUs
 Duration: 12 min 30 sec
 Load zones: 🇮🇪

 Max Throughput
12 reqs/s

 HTTP Failures
0 reqs

 Avg Response Time
41 ms

 95% Response Time
89 ms

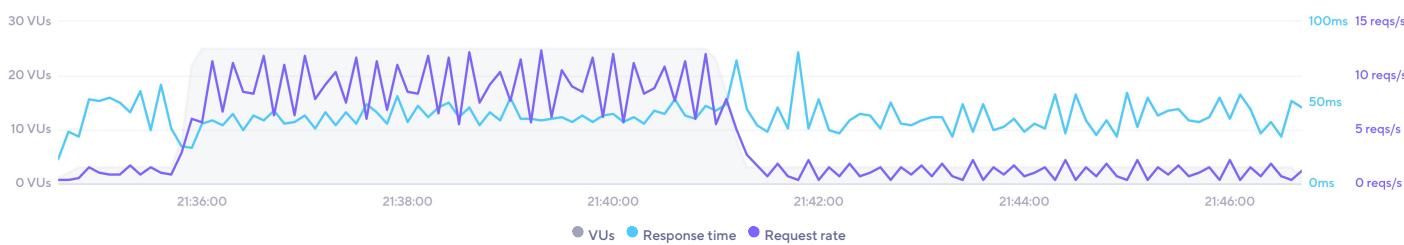

SUMMARY

This report summarizes a test run of the test "Spike Testing". It was performed on April 22, 2022 and is considered to be successful.

The test was configured to run up to **25 VUs** for 12 minutes 30 seconds. A total of **3 330 requests** were made with a max throughput of **12 reqs/s**. The sections below give a more detailed breakdown.

PERFORMANCE OVERVIEW

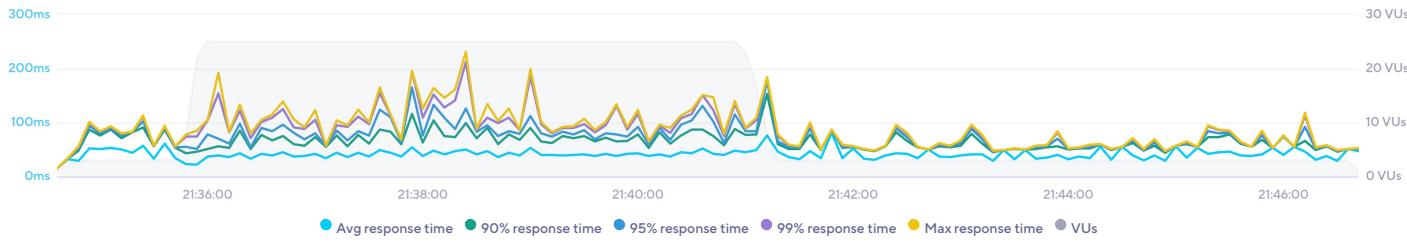

The average response time of the system being tested was **42 ms** and **3 330 requests** were made at an average request rate of **5 requests per second**.

TEST OVERVIEW

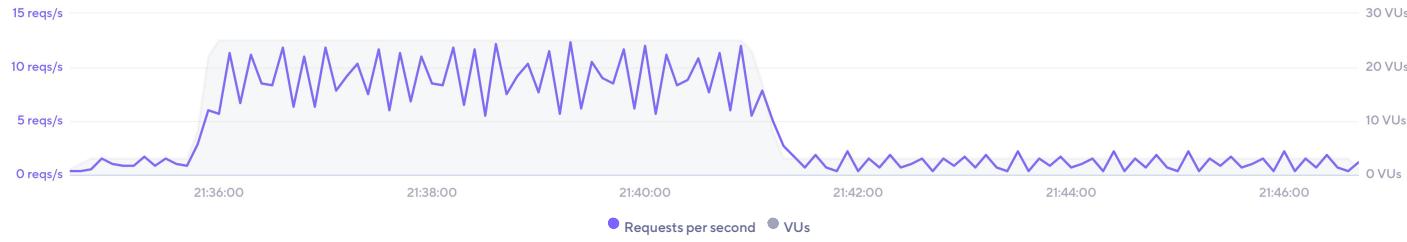

RESPONSE TIME

The maximum response time was **231 ms** at **25 VUs**. The average response time at the same point in time was **50 ms**, with 95% of requests taking less than **126 ms**.

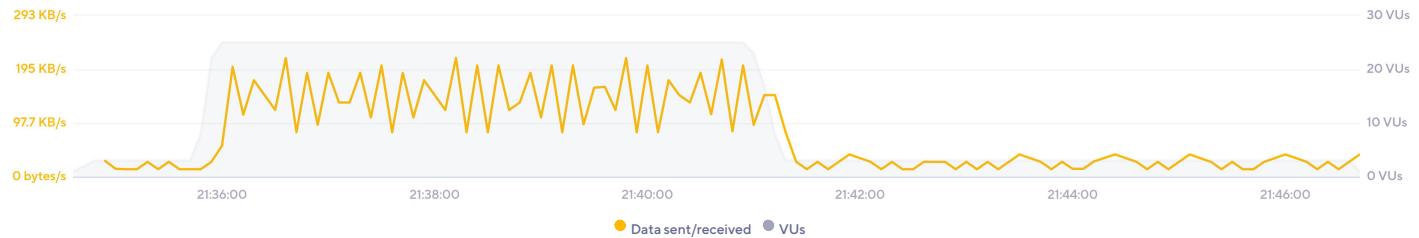

THROUGHPUT

The test had an overall average request rate of **4.5 reqs/s** peaking at **12 reqs/s** while running **25 VUs**.

BANDWIDTH

The amount of data sent peaked at **25 VUs**, sending **6.64 KB/s** of data. Data received had its peak at **25 VUs** with **210 KB/s** being received.

SLOWEST REQUESTS

There were requests to **3** unique URLs, with **3** different responses received. The slowest response had an average response time of **58 ms**.

URL	METHOD	STATUS	COUNT	MIN	Avg	95%	99%	MAX
https://irischat.me/account/2/	GET	200	1998	34 ms	58 ms	101 ms	147 ms	231 ms
https://irischat.me/login/?next=%2Fchat%2F%3Froom_id%3DN	GET	200	666	14 ms	20 ms	34 ms	45 ms	71 ms
https://irischat.me/chat/	GET	302	666	11 ms	14 ms	18 ms	30 ms	35 ms

VOCABULARY

VUs

A Virtual User is a simulation of a real user making requests to the system. Multiple VUs are executed concurrently to simulate traffic to the website or API.

Throughput

The amount of transactions the system under test can process, showing the capacity of the website or application.

Checks

A check is an assertion that the system under test behaves correctly, e.g. that it returns the correct status code. They do not halt the execution of the test, but acts as a pass/fail metric.

Response Time

The time from sending the request, processing it on the server side, to the time the client received the first byte.

Latency

The time that data sent or received spends on the wire, i.e. from the start of data being transmitted until all the data has been sent.

Thresholds

Thresholds are a pass/fail criteria used to specify the performance expectations of the system under test.

ABOUT k6 CLOUD

k6 helps engineering teams prevent system failures and quickly deliver best-of-class applications. Our cutting-edge load testing platform brings cross-functional teams together to prevent reliability and scalability issues so that every application performs well. Developers, operations, and QA teams use our tools to automate testing and test earlier in the development process to bring high-quality products to market faster.

For more than 20 years, we have consulted businesses about load testing. We have spent the past 12 years developing state-of-the-art load and performance testing tools. 6,000+ customers—including Grafana, Microsoft, Carvana, and Olo—run millions of k6 tests every month. For more information, visit <https://k6.io>.
