Executive Summary Report

Automated load test report and summary for test Soak Test in organization ghiathchaal.beg@gmail.com

EXECUTIVE SUMMARY - Soak Test

PASS

Status: **PASS**
 Created: 23 Apr 2022 at 22:49
 Started by: ghiathchaal.beg@gmail.com
 VUs: 50 VUs
 Duration: 12 min 30 sec
 Load zones:

Max Throughput
12 reqs/s

HTTP Failures
0 reqs

Avg Response Time
119 ms

95% Response Time
198 ms

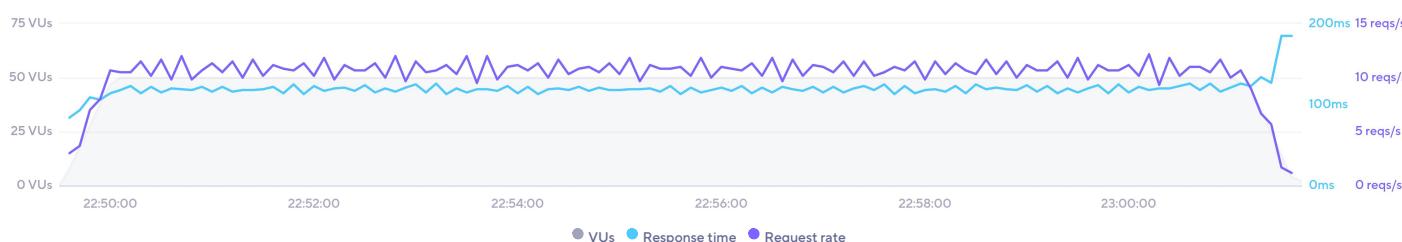

SUMMARY

This report summarizes a test run of the test "Soak Test". It was performed on April 23, 2022 and is considered to be successful.

The test was configured to run up to **50 VUs** for 12 minutes 30 seconds. A total of **7 542 requests** were made with a max throughput of **12 reqs/s**. The sections below give a more detailed breakdown.

PERFORMANCE OVERVIEW

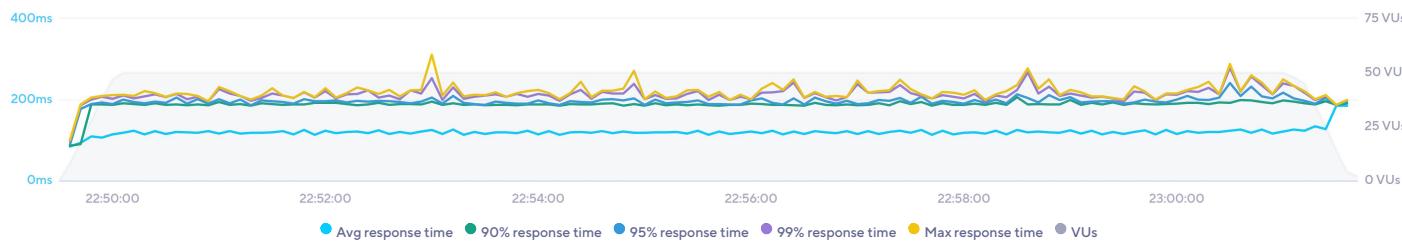

The average response time of the system being tested was **119 ms** and **7 542 requests** were made at an average request rate of **10 requests per second**.

TEST OVERVIEW

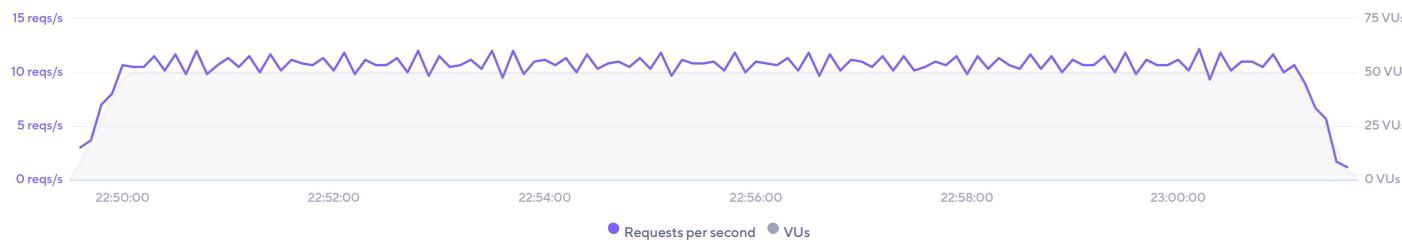

RESPONSE TIME

The maximum response time was **311 ms** at **50 VUs**. The average response time at the same point in time was **125 ms**, with 95% of requests taking less than **205 ms**.

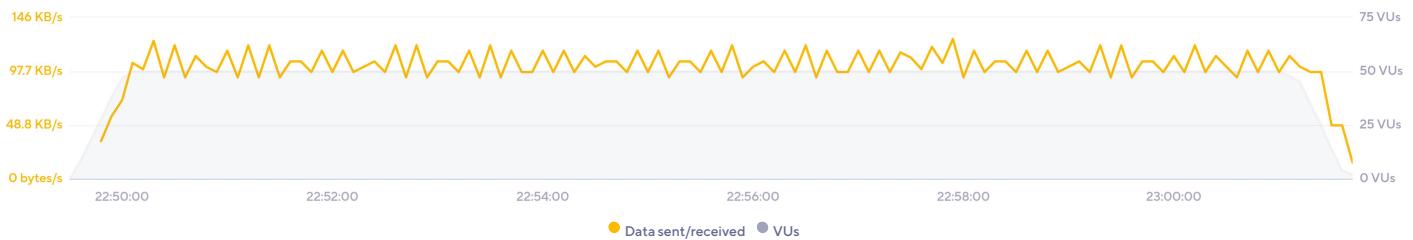

THROUGHPUT

The test had an overall average request rate of **10 reqs/s** peaking at **12 reqs/s** while running **50 VUs**.

BANDWIDTH

The amount of data sent peaked at **50 VUs**, sending **6.19 KB/s** of data. Data received had its peak at **50 VUs** with **121 KB/s** being received.

SLOWEST REQUESTS

There were requests to **3** unique URLs, with **3** different responses received. The slowest response had an average response time of **190 ms**.

URL	METHOD	STATUS	COUNT	MIN	Avg	95%	99%	MAX
https://irischat.me/account/1/	GET	200	2514	177 ms	190 ms	212 ms	234 ms	311 ms
https://irischat.me/login/?next=%2Fchat%2F%3Froom_id%3DN	GET	200	2514	81 ms	86 ms	95 ms	103 ms	138 ms
https://irischat.me/chat/	GET	302	2514	79 ms	81 ms	83 ms	85 ms	109 ms

VOCABULARY

VUs

A Virtual User is a simulation of a real user making requests to the system. Multiple VUs are executed concurrently to simulate traffic to the website or API.

Throughput

The amount of transactions the system under test can process, showing the capacity of the website or application.

Checks

A check is an assertion that the system under test behaves correctly, e.g. that it returns the correct status code. They do not halt the execution of the test, but acts as a pass/fail metric.

Response Time

The time from sending the request, processing it on the server side, to the time the client received the first byte.

Latency

The time that data sent or received spends on the wire, i.e. from the start of data being transmitted until all the data has been sent.

Thresholds

Thresholds are a pass/fail criteria used to specify the performance expectations of the system under test.

ABOUT k6 CLOUD

k6 helps engineering teams prevent system failures and quickly deliver best-of-class applications. Our cutting-edge load testing platform brings cross-functional teams together to prevent reliability and scalability issues so that every application performs well. Developers, operations, and QA teams use our tools to automate testing and test earlier in the development process to bring high-quality products to market faster.

For more than 20 years, we have consulted businesses about load testing. We have spent the past 12 years developing state-of-the-art load and performance testing tools. 6,000+ customers—including Grafana, Microsoft, Carvana, and Olo—run millions of k6 tests every month. For more information, visit <https://k6.io>.
